

# ECOCAPS<sup>™</sup>

Non-Animal Softgels

## **ALL THE ADVANTAGES OF STANDARD SOFTGELS WITHOUT THE GELATIN.**

Finally, the non-animal alternative to gelatin has arrived. EcoCaps<sup>™</sup> non-animal softgels are made from vegetable ingredients. They have all the advantages of standard softgels but do not contain gelatin. Thus, they appeal to a wide range of consumers seeking non-animal alternatives for health, dietary, religious, or animal-rights reasons.

- ▶ Patent-Pending formula is based on plant carbohydrates, manufactured into encapsulating films using a newly developed patent-pending process.
- ▶ Capsules are robust on stability testing, and are compatible with current softgel fill materials of several types.
- ▶ Applicable to both softgels and Soflet<sup>®</sup> Gelcaps dosage forms; versatile enough to provide a wide range of product opportunities.

**EXPAND YOUR PRODUCT OFFERING WITH AN  
ALTERNATIVE TO GELATIN BOTH YOU AND YOUR  
CUSTOMERS CAN FEEL CONFIDENT ABOUT.**

**ECOCAPS**<sup>TM</sup>  
Non-Animal Softgels

FEATURES	BENEFITS
Delivers all the advantages of standard softgels but does not contain gelatin	Appeals to a wide range of consumers looking for animal-free alternatives
Uses a unique, patent-pending formulation	Provides new product opportunities
Technology may be applied to Soflet® Gencaps as well as softgels	Versatile enough to provide a variety of solutions for your non-animal corporate initiatives
Undergoes rigid strength and stability testing	Meets the same high standard of product excellence upon which Banner customers have grown to depend

Whether you're interested in penetrating untapped consumer markets, or you need to explore alternatives for existing products, EcoCaps<sup>TM</sup> non-animal softgels could be just the solution. Contact your Banner sales representative to determine if your compound might benefit from this proprietary technology.
