

Consumer Healthcare

Banner has made a significant difference working to improve the health and well being of consumers. Whether we're selecting the right dosage form or working with complex formulas to enhance bioavailability, to control release rate, or to maximize shelf life in softgel form, our interdisciplinary teams work together in the spirit of partnership with pharmaceutical companies to ensure the best formula and dosage form are available to the consumer.

A leader in the development of gelatin-based drug delivery, Banner has invested significantly in making consumer-preferred drug delivery systems that may also enhance the performance of drug compounds. This has made Banner the market leader in softgel technology and the choice of many major pharmaceutical companies who continue to partner with Banner.

Over-the-Counter Pharmaceutical Products

Banner is a leader in the over-the-counter medication market, with softgel technologies ranging from gastrointestinal products (docusate sodium) to cough and cold products (acetaminophen with pseudoephedrine). In Mexico, Banner routinely manufactures suppositories for the over-the-counter market as both branded and private labels.

In addition, Banner supplies its Soflet® Gelcaps dosage form to major pharmaceutical firms and private label suppliers for analgesics (acetaminophen) and feminine pain relievers.

Rx Pharmaceutical Products

Banner offers our Rx partners wide-ranging new product opportunities by using our gelatin-based drug delivery technologies. Banner works with clients to bring new products to market and helps clients extend the life cycle of their products. Many Rx products produced by Banner are available in today's Rx marketplace helping to provide both chronic and acute treatment through both disease and life-sustaining pharmaceutical products.
