

Drug Delivery Technology

Finally, the non-animal alternative to gelatin has arrived. EcoCaps™ non-animal softgels are made from botanical ingredients. They have all the advantages of standard softgels but do not contain gelatin. Thus, they appeal to a wide range of consumers seeking non-animal alternatives for health, dietary, religious, or animal-rights reasons.

Applicable to both softgels and Soflet® Gelcaps dosage forms, EcoCaps™ non-animal technology is versatile enough to provide a wide range of product opportunities. Banner's EcoCaps™ non-animal softgel capsules undergo rigid strength testing, meeting the same high standard of product excellence upon which our customers have grown to depend.
