Banner's European facility is located in the south of the Netherlands, in the university city of Tilburg. With a population of nearly 200,000 inhabitants — of which more than 25,000 are students — Tilburg is the Netherlands' sixth largest city.

Banner's Tilburg facility opened its doors in 1994. Since then it has grown to a full-sized manufacturing plant for softgels and Soflet® Gelcaps. Although its main customer base has long been the dietary supplement industry, Banner Europe is now also focusing on the production of pharmaceutical products. In addition, Banner Europe now licenses its own products, which will be sold through partners in all major European countries. Since Banner's European pharmaceutical customer base is becoming more and more global, the European Banner facility has obtained approval for pharmaceutical production from regulatory bodies worldwide.
